MONTHLY STATISTICAL SUMMARY OF WESTERN AUSTRALIA

JUNE 1969

NOTES

1. Statistics shown in this publication are the latest available at the date of preparation. Many of the figures appearing in this Summary are therefore preliminary and may be amended in subsequent issues. Reference should therefore always be made to the latest available issue.
2. Several tables contain figures which have been rounded (to thousands or, in some cases, millions), without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.
3. Population estimates for 30 September 1967 were the first to be made for a date subsequent to the repeal of section 127 of the Australian Constitution, which required that 'in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted'. Accordingly, current estimates no longer exclude full-blood Aborigines. Estimates shown in this publication for dates and periods earlier than 30 September 1967 also relate to total population, i.e. including Aborigines.
Vital statistics also are now compiled on a basis which includes vital events among the whole population, including Aborigines. These statistics were first prepared in respect of the March quarter 1967, statistics for earlier periods remaining on the old basis.
4. The employment estimates shown on page 8 in this publication are not directly comparable with statistics derived from the 1966 Population Census, for which new work force definitions were adopted. Revised estimates for each month from June 1966 to March 1969 will be published by the Commonwealth Statistician, Canberra in a special bulletin to be issued in July. This new series will be based on 1966 Census benchmarks and will therefore be at a higher level than the present series. In due course the estimates for periods prior to the Census of June 1966 will be revised, but on a basis comparable with that of the 1961 Census benchmarks, the information needed to revise these benchmarks on the 1966 Census basis not being available. The present series will not be continued beyond February 1969.
5. The Consumer Price Index (see page 11) consists of a series of short term retail price indexes linked to form one continuous series. Up to December quarter 1968 there had been five such short term indexes. For March quarter 1969, the sixth of these short term indexes is introduced. The process of linking ensures that the series reflects only price variations and not differences in cost of the old and new combinations and lists of items. The introduction of new items and weights by linking does not, of itself, raise or lower the level of the index. Details of changes made at the link are set out in the bulletin 'Consumer Price Index - March 1969' issued by the Commonwealth Statistician, Canberra.
The reference base year of the index has been changed from 1952-53 = 100.0 to 1966-67 = 100.0. Index numbers on the new base are, of course, convertible to index numbers on the old base by the application of an arithmetical factor based on the relationship of the relevant series in 1952-53 and 1966-67. Apart from slight rounding differences, index numbers for past periods show exactly the same percentage movement on either reference base.
6. Additional information may be obtained, if required, for many of the series published in this Summary by contacting the appropriate section of this Office (Telephone 21 8041).

16 November	31.96	23.97	1968 - 22 November(b)	35.45	27.08

(a) The rates shown are those which applied until a decision of The Western Australian Industrial Commission dated 27 June 1967. The terms of this decision were that the minimum weekly wage payable to adult male workers under certain awards be increased from \$36.55 to \$37.55; that the wage rates for adult workers not in receipt of the "minimum wage" be increased by 60 cents per week; and that other wage rates be adjusted as if the basic wage for males and the basic wage for females had been increased by that amount. These increases were declared to operate from the beginning of the first pay-period commencing on or after 1 July 1967. A further increase of \$1.35 a week for adult males and adult females was granted by the Industrial Commission in October 1968 to operate from the beginning of the first pay-period commencing on or after 25 October 1968. (b) Rates prescribed under the provisions of the Industrial Arbitration Act Amendment Act, 1968.

(a) Most cargoes are recorded in terms of the ton weight of 2,240 lb but some cargo, consisting mainly of bulky commodities, is recorded on the basis of the ton measurement, a unit equivalent to 40 cubic feet of space. Statistics are compiled accordingly in terms of 'tons weight' or 'tons measurement'. In order to provide a ready comparison, as in this table, of the volume of cargo discharged or shipped the amounts recorded in the two categories have been aggregated.

(a) Figures are shown to one decimal place to avoid distortions that would occur in rounding off the index numbers to the nearest whole number. (b) Prices for all items in the index were not collected prior to July 1968 and imputation was necessary in a number of cases. Consequently, movements shown by index numbers prior to July 1968 include movements of imputed price series. (c) Includes the groups Electrical installation materials and Mechanical services components. The whole of the former group, and the majority of the items in the latter group are based on Sydney and Melbourne price series. The Electrical installation materials group is a quarterly measure.
